Mumbai, Maharashtra

SUMMARY

Backend and systems developer with hands-on experience in Go, building CLI tooling and Linux-native VM management with QEMU/KVM. Proficient across the web stack with TypeScript, Next.js, React, and real-time collaboration platforms. Experienced in Android development with Java and database management via SQL and MongoDB. Focused on writing clean, performant backend systems; open to roles in Go, backend, or full-stack development.

EDUCATION

MCT's Rajiv Gandhi Institute of Technology <i>B.E. in Computer Engineering, Mumbai University</i> Vidyalankar Polytechnic <i>Diploma in Information Technology – 89.81%</i>	Mumbai, Maharashtra <i>Jul. 2025 – Jul. 2028</i> Mumbai, Maharashtra <i>Jun. 2022– Jun. 2025</i>
--	---

EXPERIENCE

Junior Software Engineer <i>Hertzsoft Technologies Pvt. Ltd.</i> Gained hands-on experience integrating frontend and backend technologies into production-ready solutions	Jun. 2024 – Jul. 2024
---	-----------------------

PROJECTS

12pm: Rootless VM Manager <i>Go, QEMU, KVM, Cobra, Cloud-Init, Linux</i> <i>Private Repo</i> - Built a fast, rootless, developer-first VM manager for Linux in Go using the Cobra CLI framework, inspired by Docker's developer experience - Achieved a 5.5s cold boot (8x faster than VirtualBox) via KVM acceleration and auto-optimized cloud-init - Implemented multi-VM management with dynamic port allocation, passwordless SSH shell access, snapshot save/restore, and stale PID auto-detection - Designed 9 switchable terminal themes; currently building Docker-style port mapping and volume mounts	May 2026
AtriumVerse <i>Next.js, FastAPI, Phaser 3, LiveKit, PostgreSQL, Redis</i> - Built a tile-based virtual office platform where player position drives proximity audio, zone-based video, and messaging - Implemented a zero-knowledge end-to-end encryption system (X25519, ECDH, AES-256-GCM) for channels and DMs with per-epoch key rotation - Integrated LiveKit WebRTC for proximity audio and zone video, and a Phaser 3 game engine for tile-based movement - Designed an async FastAPI backend with PostgreSQL, Redis, and a WebSocket gateway for real-time state sync	April. 2026
Code Collab <i>TypeScript, Next.js, Liveblocks</i> - Built a real-time collaborative code and document editing platform that removes version-control delays - Enabled multiple developers to work side-by-side in the browser with live synchronization	Feb. 2025
StallSpot <i>Next.js, MongoDB, WebSocket</i> - Developed a web platform for interactive stall booking at exhibitions and trade fairs - Designed a dynamic floor plan with real-time stall selection for organizers and vendors via WebSocket	Oct. 2024
2D Interactive Playground <i>React, React-Konva, Shadcn UI</i> - Built a canvas editor for creating and manipulating 2D graphics and text - Evolved the project into a full-stack web application with rich, reusable UI components	Sep. 2024
Travel Mate <i>Android, Java, Google Maps API</i> - Developed an Android app for seamless trip planning, including itineraries and travel journals with notes and media - Integrated Google Maps API for live weather updates and turn-by-turn navigation	Mar. 2025

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, Go, C++ Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, HTML/CSS Backend & APIs: FastAPI, REST APIs, WebSocket, Pydantic, OAuth Systems & DevOps: Go/Cobra CLI, QEMU/KVM, Linux, Git/GitHub Databases: MongoDB, SQL, PostgreSQL, Firebase Mobile & Other: Android Studio, Java for Android, Google Maps API, Liveblocks, Prompt Engineering
